

atom

[Quasimodo]

- have overall charge
- become ion
- have energy
- become stable
- combine form
- emit light
- have neutrons
- have charge of zero
- combine with other atoms
- have neutral charge

[conceptNet] has properties...

- very very small

[conceptNet] is a type of...

- substance
- material

electrons

[Quasimodo]

- be in atom
- have mass
- leave atom
- have energy
- move around the nucleus
- have negative charge
- move around nucleus
- have charge
- orbit the nucleus
- has movement spin

[conceptNet] is a type of...

- lepton

nucleus

[Quasimodo]

- be considered as a control center of the cell
- be in cell
- be regarded as the control center of the cell
- do in cell
- be known as the control center of the cell
- has property most of the mass
- has property the brain
- has property cell
- be visible in elodea
- be called as the director of the cell

[conceptNet] is a type of...

- organelle
- center
- neural structure
